NICHOLAS A. TOUMPAS  
COMMISSIONER

October 7, 2010

The Honorable Marjorie K. Smith  
Chairman  
Fiscal Committee of the General Court  
State House  
Concord, NH 03301

***Re: Dashboard - August 2010***

## **Information**

Pursuant to Chapters 143 (HB1) and 144 (HB2), Laws of 2009, the Department of Health and Human Services is providing this dashboard report. The purpose of this dashboard is to provide summary information on enrollments in several of the high cost programs managed by the Department. Enrollment in these programs is a significant cost driver and will impact funding needs for both the current fiscal year and for development of operating budgets for State Fiscal Years ending June 30, 2012 and 2013. This dashboard along with the quarterly report to Fiscal Committee on expenditures for the Medicaid program provides a status on demand for services in entitlement programs.

## **Explanation**

Chapter 144:39 (HB2), Laws of 2009, provided certain restrictions and authorities to the Department of Health and Human Services to address potential budget shortfalls. Specifically, paragraph I required prior approval of the Fiscal Committee of the general court and Governor and Council (G&C) for any change to program eligibility standards or benefit levels that might be expected to increase or decrease enrollment in the program. Paragraph III authorized the Commissioner to transfer funds, with the exception of class 060, benefits, within and among all PAUs within the Department, as the Commissioner deemed necessary and appropriate to address present or projected budget shortfalls subject to the approval of the Fiscal Committee and G&C. Chapters 143:9 and 143:13 (HB1), Laws of 2009, required the Department to provide a quarterly report of reductions made under these sections to the Fiscal Committee and G&C.

## **Individuals Enrolled For Services**

It was reported recently the recession, which began in December 2007, has ended. That does not mean enrollment in programs managed by the Department has declined or are expected to in the near future. Total unduplicated individuals enrolled in programs was 151,231 in August 2010 versus 117,464 when the recession began in December 2007. This represents an increase of nearly 29% (33,767 individuals). The growth rate has, however, slowed. From June 2009 through March 2010 year-over-year enrollment increased 11+%; July and August 2010 has seen that rate moderate to 7.2%.

### Medicaid

An independent report commissioned by the Department titled "New Hampshire Medicaid Program Enrollment Forecast-SFY 2011-2013 Update" by Professors Ross Gittel and James Carter of the University of New Hampshire, Whittemore School of Business and Economics stated "...the number of New Hampshire residents who are officially unemployed was the most useful economic indicator in explaining annual changes in Medicaid enrollment" and more specifically ".....was most useful for explaining annual changes in enrollment for TANF adults and children."

Table A shows the relationship between the New Hampshire unemployment rate and enrollment in all programs. Unemployment has declined from a high of 7.1% in February 2010 to an August 2010 rate of 5.7% and the growth rate in Medicaid enrollment has declined from a high of 10+% from August 2009 through December 2009 to a more moderate growth rate of 4+% in July and August 2010.

An improvement in employment does not, however, result in a decline in Medicaid enrollment, only a decline in the growth rate. The unemployment rate, when the recession began in December 2007, was 3.4% and Medicaid enrollment was 102,432. In August 2010, those figures are 5.7% and 118,847 respectively. Medicaid enrollment remains 16% higher than it was when the recession began. The report also compared Medicaid enrollment to unemployment in prior recessions and notes "The analysis showed that for TANF adult and children that there is a lag between when the annual rate of change in unemployment peaks and when the peak in annual enrollment growth is reached. Enrollment activity after both recessions supports this and shows that after the start of a recession, enrollment activity continues at a strong pace for these two groups, for a period of time (6-10 months) after job losses plateau."

On a national level, a Fiscal Survey of the States published in December 2009 by the National Governors Association and the National Association of State Budget Officers states that "Medicaid enrollment is anticipated to rise even further. For example, in fiscal 2002, enrollment increased by 9.5 percent a year following the 2001 recession." We expect the affects of the economy will linger into the new biennium.

Options for controlling Medicaid spending meanwhile are limited. Medicaid costs are a function of enrollment, utilization and rates. Rates have been reduced or frozen in past budget reduction programs, controlling utilization is restricted by State and federal regulation, and reducing enrollment through changes in eligibility criteria is prevented by the American Recovery and Reinvestment Act (ARRA) and federal health care reform, Patient Protection and Affordable Care Act (PPACA).

### FANF

Enrollment in Financial Assistance to Needy Families (FANF) is 13,981 in August 2010, 31% (3,282 individuals) higher than when the recess began and the demand for FANF services remains at historic highs. However, we have now seen the fourth month with modest declines in the enrollment growth rate. From December 2008 through March 2010 year-over-year increases ranged from 12% to 27%. In July and August 2010, those figures were 4.1% and 3.6%, respectively.

#### APTD

Enrollment for Aid For the Permanently and Totally Disabled (APTD) in August 2010 was 8,643, which is 34% (2,216 individuals) higher than when the recess began. Growth rates have consistently been 10+%. In July and August 2010, those figures were 9.7% and 8.9%, respectively. The growth in enrollment mirrors a national trend as well. An ABC/AP news report in May 2010 reported "About 3.3 million people are expected to apply for benefits this year. That's 300,000 more than last year and 700,000 more than in 2008." According to the Social Security Administration, new claims for disability benefits rose nearly 17 percent nationwide in fiscal year 2009. A December 2009 article on MSNBC.com states "Advocates and officials say the rising claims are driven by two main factors: the aging of the baby boomer generation and the slumping economy. The average age of disability we see nationwide is 50, so the baby boomers have already reached their peak years of disability. That, by itself, has been driving up volume big-time over the past decade," said Jim Allsup, founder and CEO of Allsup Inc., a national disability representation firm. "Then they just went into the stratosphere because of the recession." An additional problem for the State's program is that this increase has caused the claim processing time for SSDI benefits to grow and delays in determining eligibility for SSDI lead to higher cash grants for APTD clients.

#### Elderly Long Term Care

Enrollment for long term care services (home care, assisted living, and nursing facility) was 7,098 in August 2010, which is lower by 3.1% (225 individuals) than August 2009. From May 2010 to current, enrollment in assisted living has been increasing by 10+% and is now at 389, while enrollment in home care has declined by 5% to 6% and is now at 2,494 and nursing facility has declined by 2% to 4% and is now at 4,215. Elderly enrollment for other Medicaid services was observed in the Gittell/Carter report. "Unexpectedly, the rate of elderly enrollment has been approximately 3% since the recession began and this is significantly above the longer-term trend of 1.7% observed between the 2001 and 2007 recession. This contrasts with previous analysis (Gittell & Magnusson, Jan 2010, Feb 2009, Aug 2008), which found no relationship between elderly enrollment and unemployment. This uptick in the enrollment rate for the elderly suggests that this population, while to a much smaller extent than the TANF Medicaid categories, was impacted by the recession."

#### Food Stamps

Enrollment in the Supplemental Nutrition Assistance Program (SNAP) has been increasing at unprecedented rates. Enrollment in August 2010 was 109,950, which represents a 79% increase since the recession began. While these benefits are paid for with federal dollars, applications for SNAP place a burden on the Department's resources for eligibility determinations and SNAP trends manifest themselves in enrollment growth in state funding programs as SNAP clients exhaust resources and become eligible for state-funded programs.

October 7, 2010

### **Restructuring Administrative Organization**

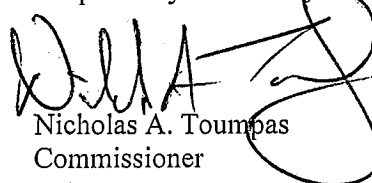

Appropriations for SFY10 and SFY11 anticipated reorganization and downsizing of the Department's organization by 10% to 12%. In January 2008, 196 positions were vacant for a vacancy rate of 5.9%. At August 31, 2010, there were 542 for a vacancy rate of 16.2% (Table D). This is a result of a Vacancy Management Plan implemented by the Department and the statewide layoff of October 2009. In SFY2000, the Department had a budget of \$1.2 billion and approx. 2,811 filled positions, which equates to a staffing ratio of 2.4 employees per million dollars of budget. The SFY2011 budget is \$2.1 billion and filled positions are 2,802 for a staffing ratio of 1.3. The total budget has increased at a rate of 6.3% per year; Medicaid caseloads, which are an indicator of total demand for services has grown by 10.8% over the same period. Number of filled positions over the same period has grown at less than one-half of one percent. The high vacancy rate has and will continue to cause issues for completing critical tasks and will require elimination of functions/services not core to the Department's mission. A process for identifying those functions/services has been implemented. The magnitude of the reorganization provides one challenge and adding to that the requirement to deliver a specific amount of savings in each year makes the task even more difficult.

### **Summary**

The unknown fiscal issue for the Department is: What impact will an economic recovery have on enrollment and cost of programs managed by the Department. Stateline.org reported "In past economic downturns, the report said, states' toughest budget years have been the two years immediately after a recession is "declared over." That's because, by then, Medicaid rolls have swelled as more people lose their jobs and their health insurance, even as state revenues continue to lag."

The Department and State government as a whole are faced with significant challenges as evidenced by the Governor's instructions to develop a budget for SFY12 and SFY13 requiring general funds of not more than 95% of the SFY11 adjusted authorized appropriations. For SFY10 and SFY11, the Department was proactive in addressing these fiscal issues and was able offset program shortfalls by savings in other areas. In the long term, implementation of new technologies and changes in delivery systems must provide improvements in efficiency and effectiveness. The fiscal challenges, however, have and will continue to require difficult decisions, a clear definition of what constitutes a New Hampshire health and human service safety net, and exploration of more efficient methods to deliver services. This message has been conveyed to stakeholders, both providers and advocates, and Legislative action will be required to authorize cost reduction/restructuring plans to address these funding issues for the next biennium.

Respectfully submitted,

  
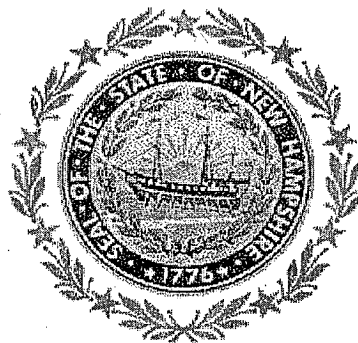

Nicholas A. Toumpas  
Commissioner
